

# *[Abnormality management device for an image forming device, abnormality management system, and program for the same]*

## Abstract

An abnormality management device for an image forming device is disclosed, in which the abnormality management device is connected via a network to an image forming device comprised of a plurality of selectively used paper supply units and/or paper discharge units and which manages abnormalities in the image forming device. The abnormality management device includes a display unit, an abnormality detection unit, and an abnormality display unit. The display unit displays an image of an image forming device on which the plurality of the paper supply units or paper discharge units can be identified. The abnormality detection unit detects abnormalities in the paper supply units or the paper discharge units based upon equipment data acquired from the image forming device. The abnormality display unit displays with emphasis the location of the paper supply unit or paper discharge

unit in which an abnormality was detected by the abnormality detection unit on the image of the image forming device.
